

ACURA TL AERO KIT

The RonJon Sport Design 3rd Generation Acura TL Aero-Kit is constructed from high grade Poly-Urethane with metal fixtures embedded into the urethane. Mounting points are same as stock, but utilize a stronger, adjustable screw type mounting hardware (included) that allows the installer to dial in the kit's depth of panel to eliminate gaps. The upper grille can be carried over from the OEM bumper, or can be replaced by the Ronjon Sport Design Grille for the 3rd Generation TL which is sold seperately. The clips from the OEM bumpers are also required to be reused on the RJSD kit. There are a total of 8 openings on the kit that can have mesh installed. Mesh is included.

The RJSD 3rd Gen TL Aero-kit includes:

- Full front bumper replacement
- Side skirt replacements
- Full rear bumper replacement
- Needed Hardware included with use of OEM clips and screws
- Detachable aluminum perforated sheet metal mesh for 8 openings

Side notes:

- The pieces to the kit comes unfolded in an 8 ft x 5 ft x 5 ft box
- Professional installation is required

ACURA CL AERO KIT

The RonJon Sport Design 2nd Generation Acura CL Aero-Kit is constructed from high grade Poly-Urethane with industrial strength 3M double sided tape pre attached. Mounting requires just positioning the add on lip kit over existing bumpers and sidesills, tapping screws (included) fastened on the inner wheel well and 3M double sided tape. The front lip has extra mounting points under the air dam, and the rear lip has additional mounting points behind the license plate for a fine fit even in high temperatures. This Aero-Kit adds a classy flair to the mundane CL without being over exaggerated.

The RJSD 2nd Gen CL Aero-kit includes:

- Front Lip under-spoiler
- Side skirt overlays
- Rear Lip under-spoiler
- Tapping screws
- Double sided 3M tape
